The information contained in this map concerning the location and technical designation of the gas distribution and transmission network (the "Information") is provided 'as is' and no representation or warranty of any kind, express or implied, is made in relation to the Information and all such representations or warranties, express or implied, in relation to the Information are hereby excluded to the fullest extent permitted by law. No responsibility, liability or duty of care to you or to any other person in respect of the Information is accepted, and any reliance you or any other person places on the Information is therefore strictly at your own or their own risk. In no event will liability be accepted for any loss or damage including, without limitation, indirect or consequential loss or damage, arising out of or in connection with the use of the Information. In the event that the Information is provided by you, in whole or in part, to a third party for whatever reason you shall ensure that this disclaimer is included with the Information and brought to the attention of the third party. The actual position of the gas distribution and transmission network must be verified on site before any mechanical excavating takes place. If any mechanical excavation is proposed, hard copy maps must be requested from Bord Gais Eireann. All work in the vicinity of the gas distribution and transmission network must be completed in accordance with the current edition of the Health & Safety Authority publication, 'Code of Practice For Avoiding Danger From Underground Services' which is available from the Health and Safety Authority (1890 28 93 89) or can be downloaded free of charge at www.hsa.ie.

The fluvial and tidal Flood Zone Risk maps designate Zones, A, B and C as per the definitions and the criteria in the OPW/ DoEHLG *System and Flood Risk Management - Guidelines for Planning Authorities*. The zones do not imply the location of historical flood events. The maps are a screening tool to determine whether a further detailed flood risk assessment is required for a specific site. The Flood Zones have been developed using the best available data at the time of publication.
