Forward Planning Dept.
Clare Co. Council.

Submissions on Co. Dev. Plan.

Q. Chero.

Please consider the following points which I propose for inclusion in the next Co. Dev. Plan.

- (a) That a preamble be inserted in the next Co. Dev. Plan stating that its objective would be the continued development of the County by treating all its citizens and communities with deserved respect by acknowledging the rights, culture, heritage, aspirations and expectations of all irrespective of their place of residence, social or professional status or ethnic origins
- (b) Guide by the terms of the Flemish Decree
- (c) That Planning Applications by qualified person in areas of population decline be dealt with ~~under~~ under the headings of Health and safety only.

(d) That areas of proposed visual impact be excluded from proposed plan until such time as the Council has obtained legal assurance that it is not exposed to successful legal challenge because of the recorded fact that it has refused to disclose all the considerations and references in assessment and determination of "Visual impact"

(e) That the construction of single rural houses within a 10km of distance and on a base line of 5 metres below base of turbine be deemed not to have visual impact and that the said area inside 10km radius of nearest turbine be not included in plan as area of visual impact designation.

Miss Ke Moas
Secretary of Council
